

# **PPD Presentation Prize (proposal draft)**

**CAP/PPD 4.6.2002**

A presentation prize should be set up and awarded yearly at the CAP Congress to the student having given the best talk in the Particle Physics Division part of the congress.

## **Goals**

- o Encourage students in the field
- o Promote awareness of their work
- o Further advertise activities of the groups to the community

## **Rules**

- 1) The presentation must be part of the PPD program at the CAP Congress.
- 2) The student should be a member of PPD, either theoretical or experimental.
- 3) All such student presentations are automatically candidates to the prize.
- 4) There should be at least three (3) student presentations for the prize to be given.
- 5) The PPD jury of three (3) should be formed by the current PPD Chair. It should contain any faculty colleague (and preferably include the Chair himself/herself) to be present at all the PPD sessions.
- 6) The prize (400\$) would be awarded immediately after the last session at the CAP Congress, a cheque sent afterwards to then winner, the notification added to the minutes of the annual meeting and sent to all members.
- 7) In case of a draw, the prize could be split at most in two.

## **Historical Notes**

- o It has been checked with CAP that this is possible and allowed.
- o This proposal is an alternative to the already proposed "PPD Thesis Prize".

## **Implementation Steps**

- o The proposal would be distributed by the initiator to the PPD members one month ahead of the PPD annual division meeting at the CAP congress.
- o Modifications could be proposed to the initiator by e-mail prior to the meeting.
- o Following a very brief summary at the meeting, discussion and vote would take place immediately with the present PPD members.
